CLARISCO

CLARISCO - BLOCKCHAIN

AI & IOT (WEB3) SOFTWARE DEVELOPMENT COMPANY

LET THE INNOVATION FLOW

CLARISCO SOLUTION

Stay ahead with our tech-savvy team, constantly updating with the latest technology. With 4+ years of experience in web3-based software development, we provide tailored solutions to clients worldwide. Our crew of web3 professionals and blockchain developers push the envelope, delivering next-gen solutions for the emerging Web3 arena. We have skyscrapers all over the world in a short period of time.

| OUR MISSION & VISION

OUR MISSION

Our mission is to create exceptional, secure, and customizable applications that seamlessly integrate cutting-edge technologies, delivering an unparalleled experience to our clients..

OUR VISION

We're on a mission to revolutionize technology with Blockchain, creating a fault-proof system and futuristic solutions for businesses. Our intuitive interfaces and automation make success effortless.
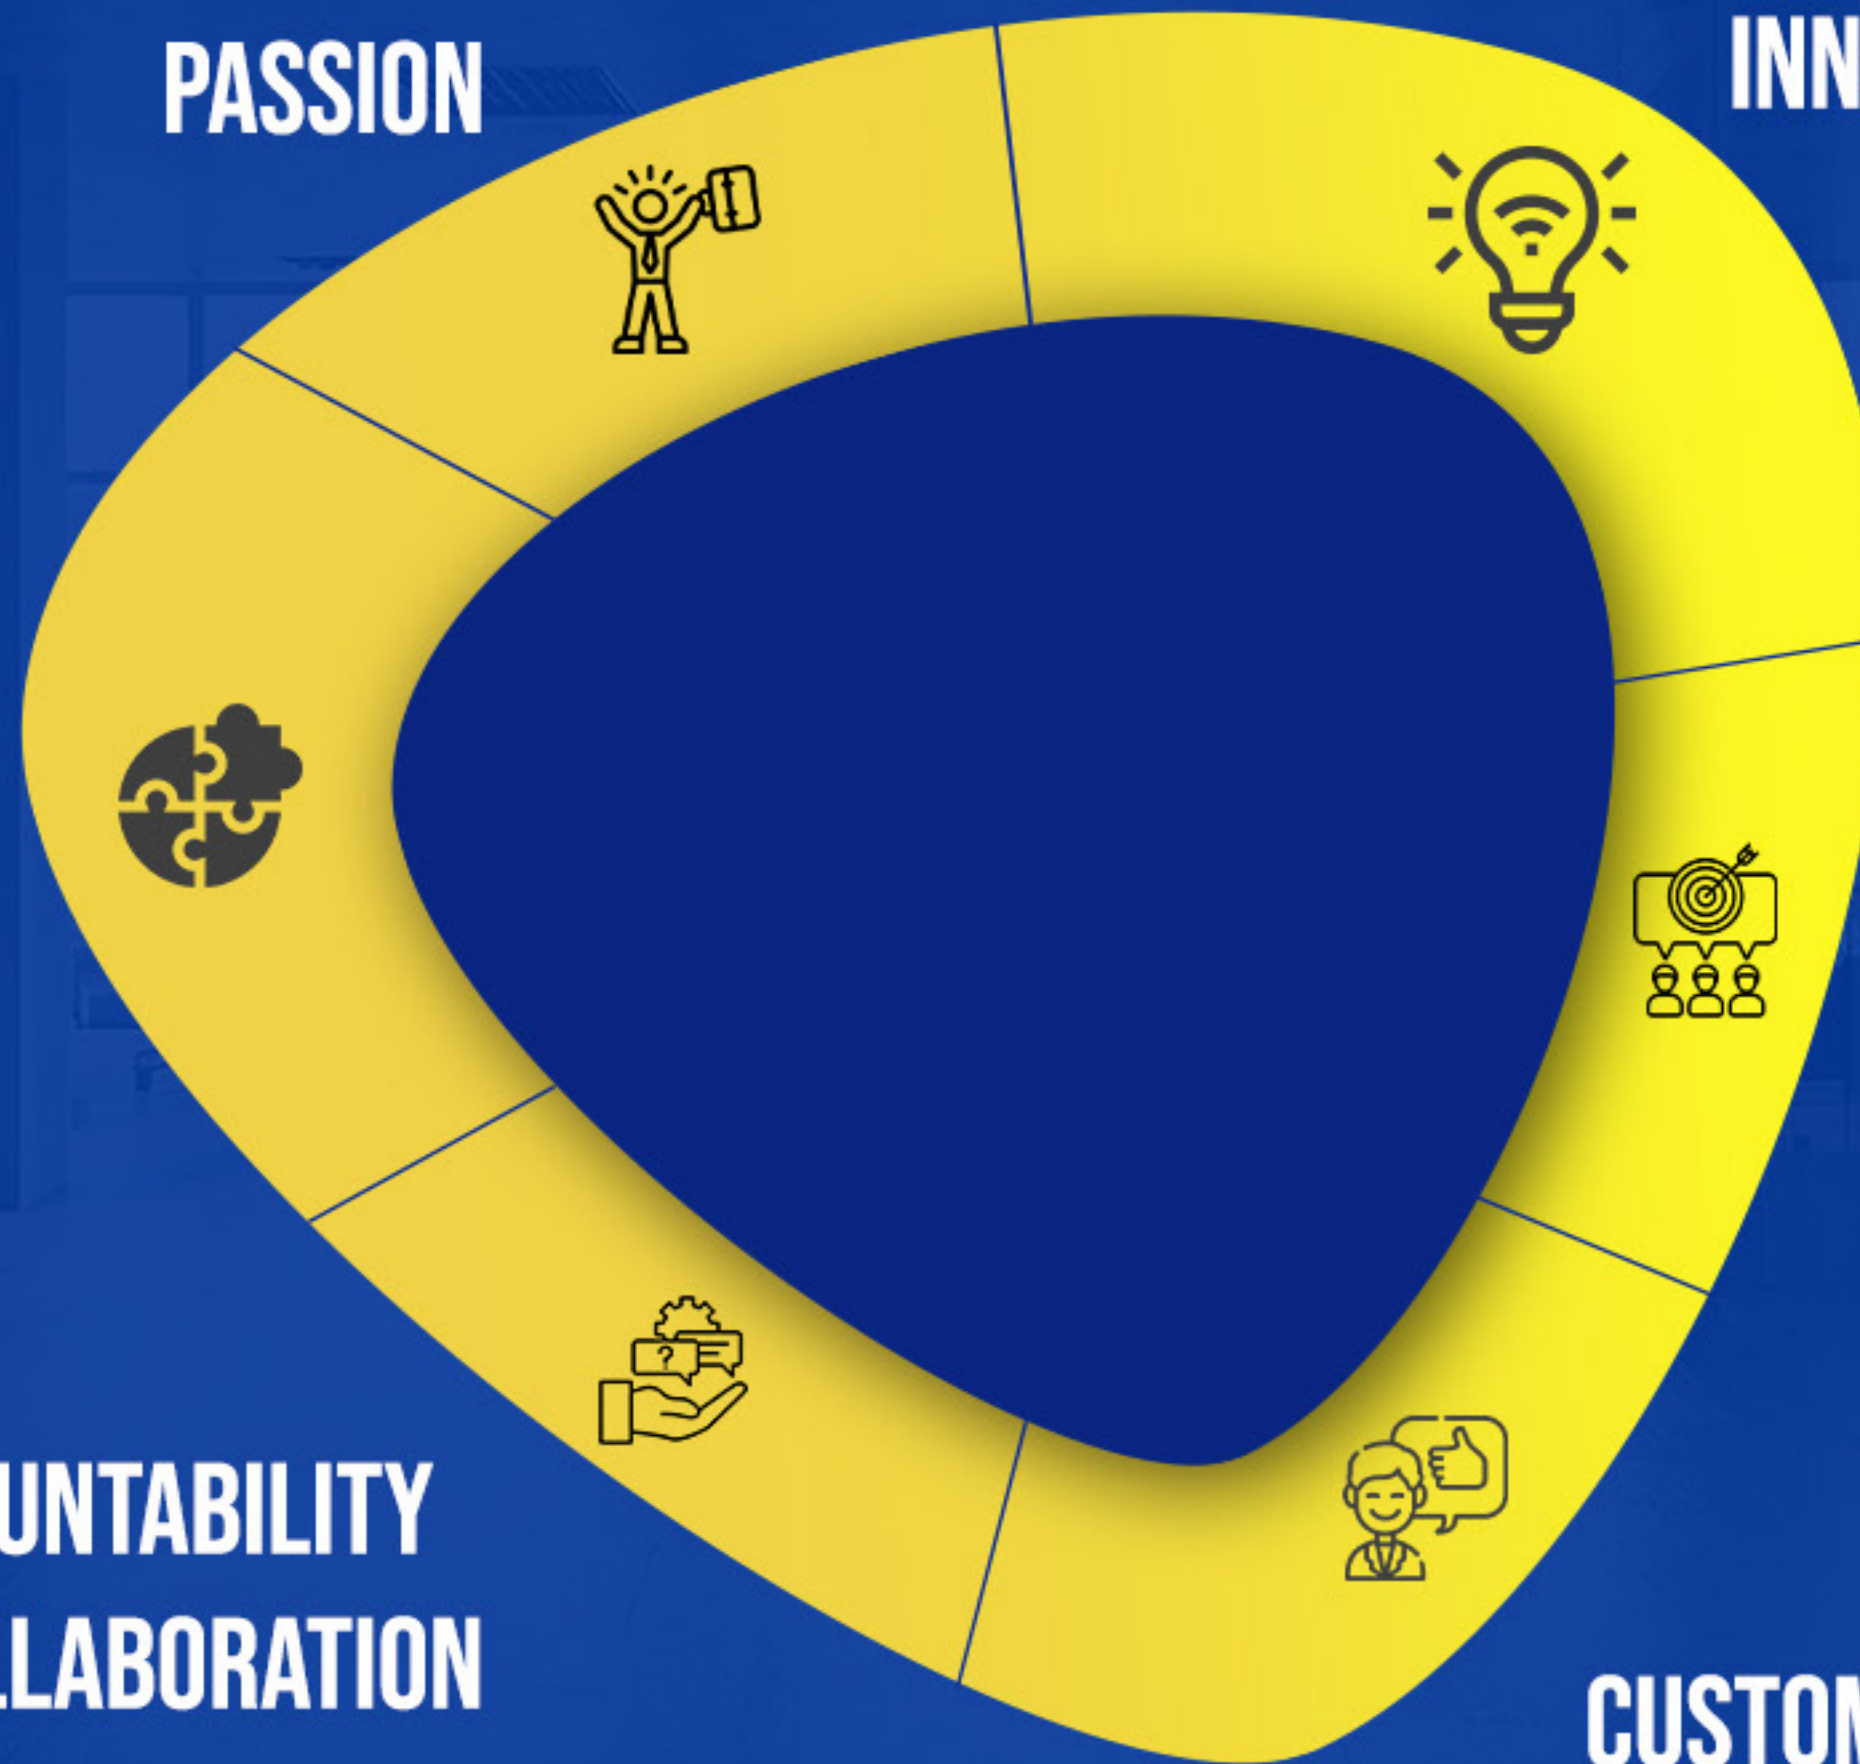

OUR PROCESS TOWARDS WORK

PROTOTYPE DESIGNING
On receiving the requirements from the clients we the technical team will analyse and create a prototype to show the clients their business model as vision of their end product

ANALYSING & GATHERING REQUIREMENTS
Requirement grasping is the first major step on the project development We will be so keen on collecting requirements for the products to be designed and developed.

PRODUCT DEVELOPMENT
Our skilled developers will start working with the client's product based on the designed prototype that is verified with clients.

TESTING
The technical testing team will proceed with the integration and validation testing once the product is developed successfully.

PRODUCT DEPLOYMENT
On completion of the project with both alpha and beta testing the project can be launched publicly. We make sure the project acts flawless

MAINTENANCE AND OPERATIONS
The work does not end with the software launch. We continue to support even after the launch so our clients doesn't face any crisis and be rest assured

OUR TECHNOLOGY STACK

REACT	MONGO DB	PYTHON
ANGULAR	LARAVEL	KOTLIN
SOLIDITY	FLUTTER	PHP
NODE JS	SWIFT	MYSQL
JAVA	REACTNATIVE

BUSINESS DEVELOPMENT TEAM

A business development team is a group of professionals dedicated to driving growth and creating opportunities for a company. Their primary goal is to identify and pursue new business ventures, partnerships, and markets to expand the organization's reach, increase revenue, and enhance its competitive position.

Business development team members typically have expertise in sales, marketing, market research, and relationship management. They work collaboratively to identify potential opportunities, build strategic relationships, and develop strategies to achieve the company's business objectives. Team member plays a crucial role in driving business growth by identifying and capitalizing on new opportunities, forging strategic partnerships, and expanding the company's presence in existing and new markets.

PROJECT MANAGEMENT

Project management is the discipline of planning, organizing, and managing resources to successfully complete a specific project within defined constraints such as time, budget, and scope. A project management professional, often referred to as a project manager, is responsible for leading and overseeing the entire project lifecycle, from initiation to closure.

A project management professional is responsible for planning, executing, and controlling projects, while effectively managing resources, risks, and stakeholders to deliver successful outcomes. They play a crucial role in driving project success through effective leadership, communication, and coordination of project activities.
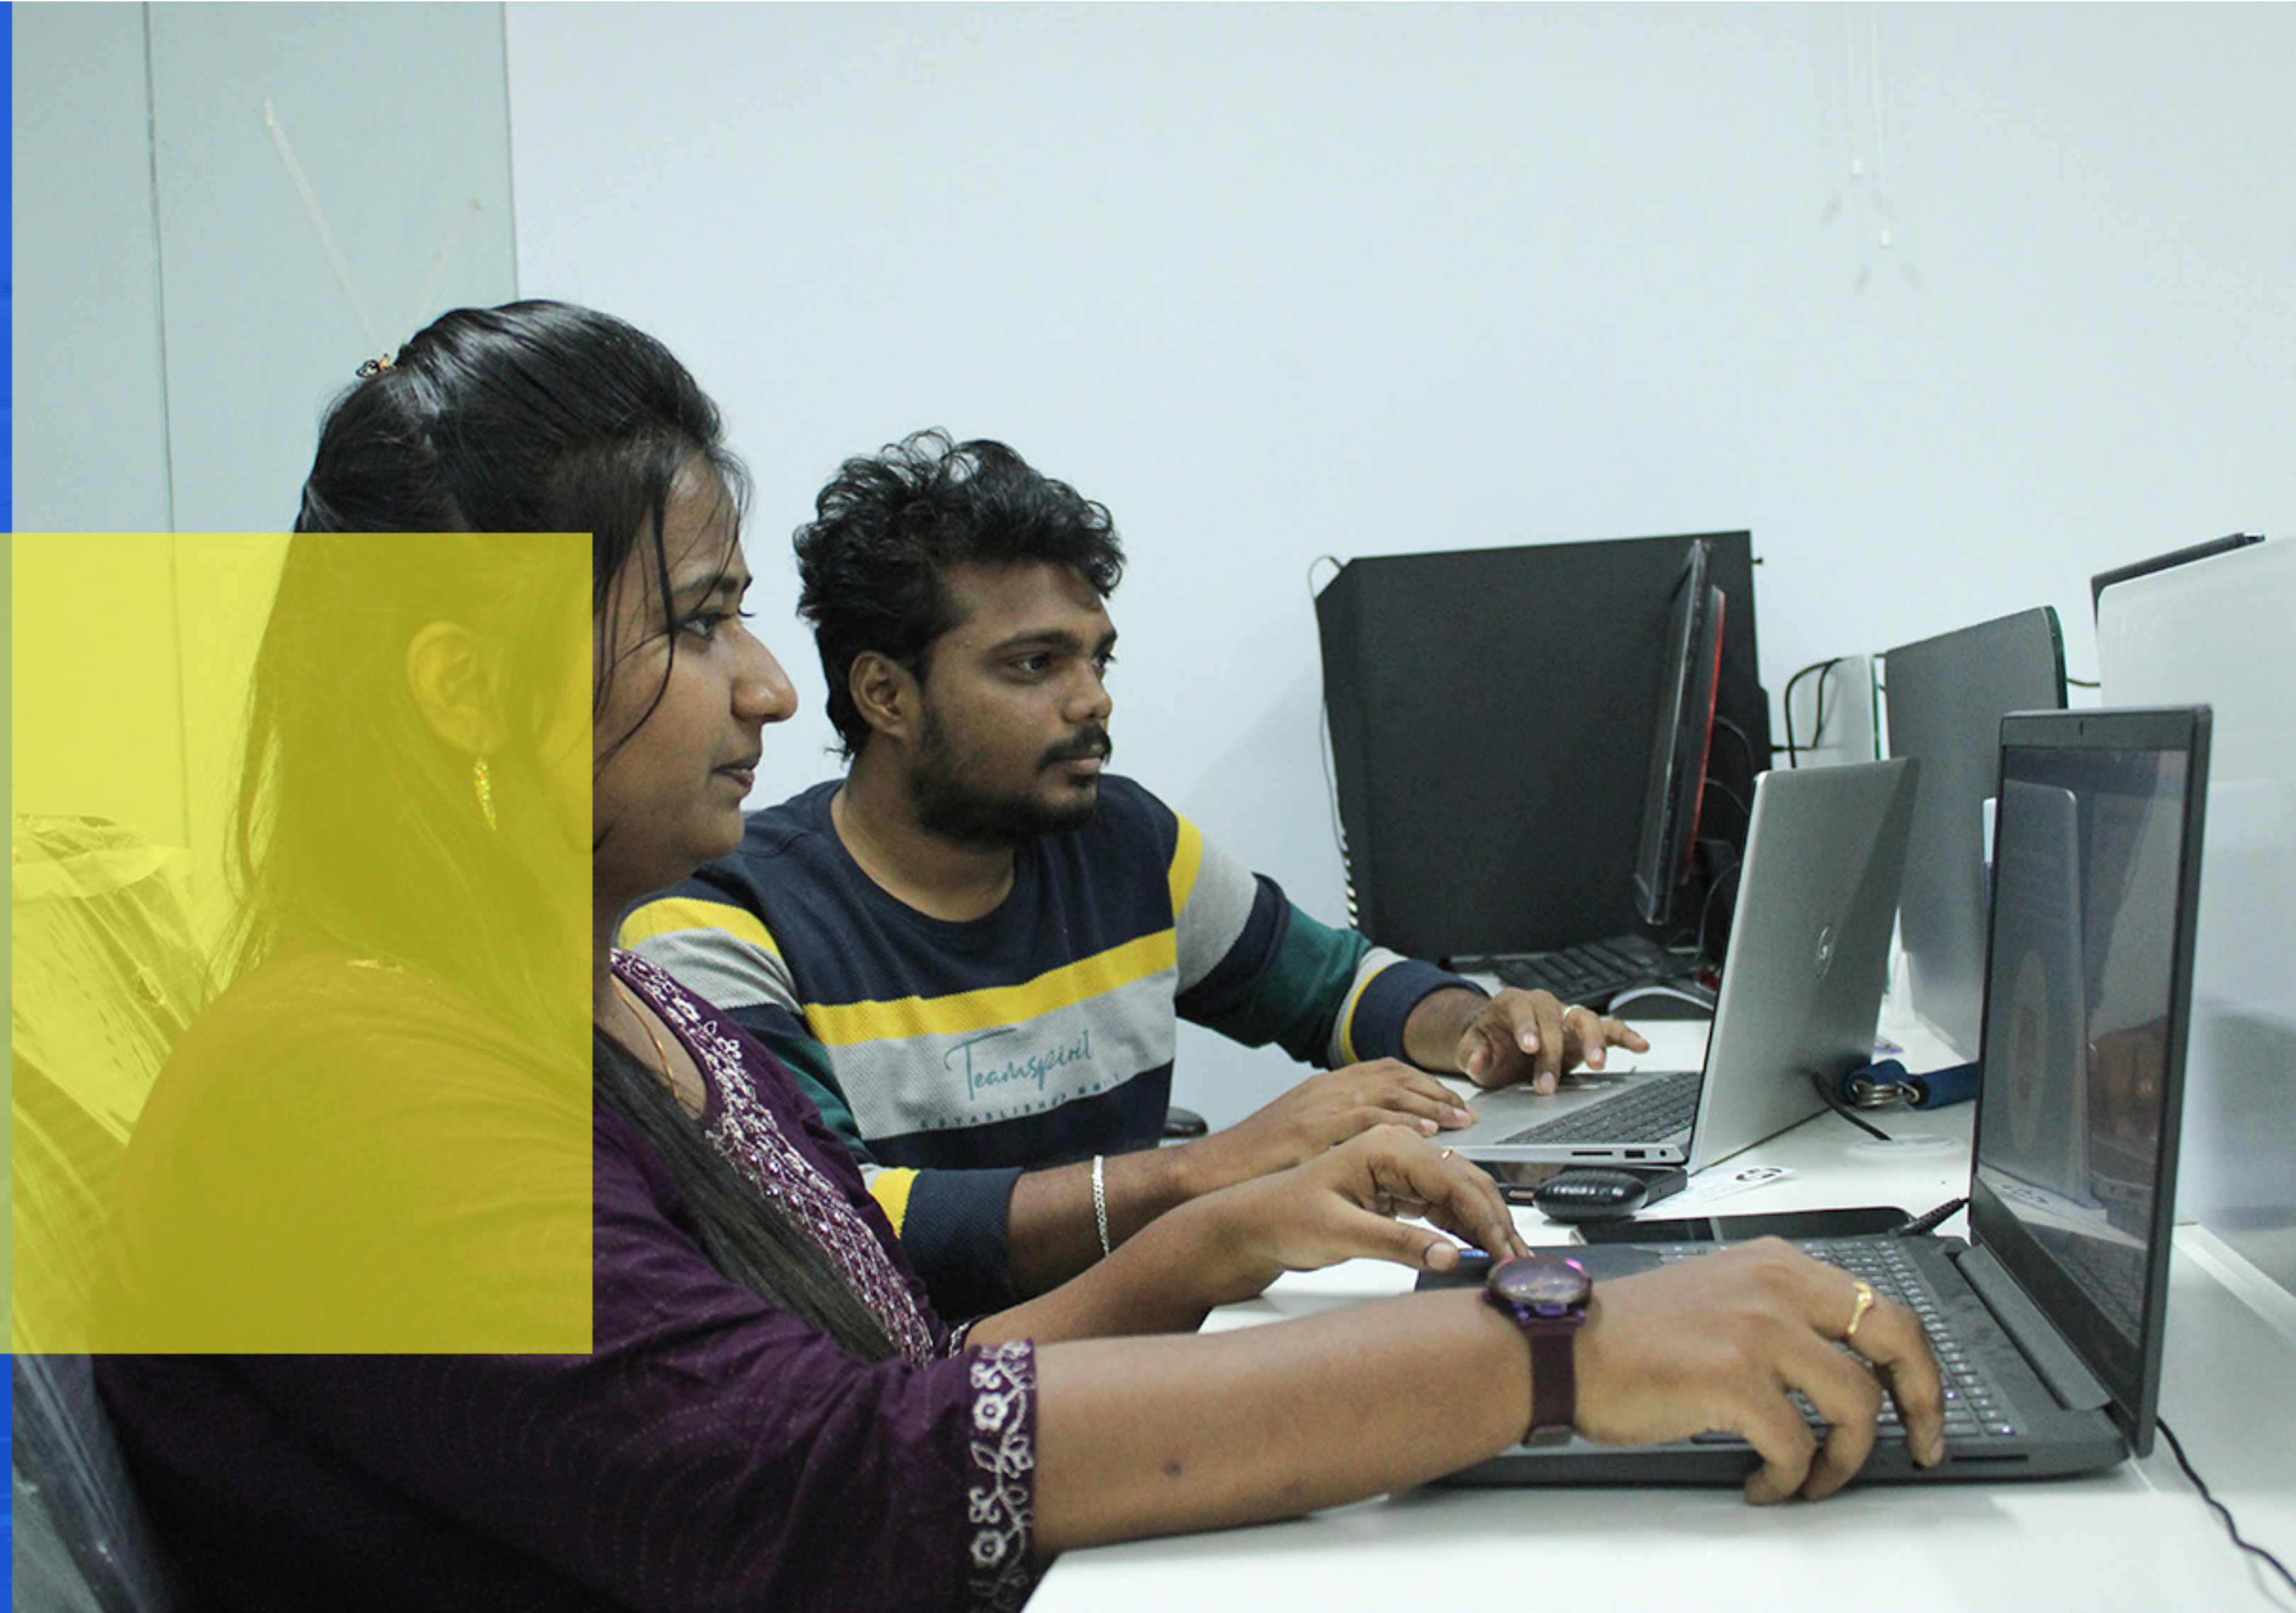

R&D TEAM

A research and development (R&D) team is a group of professionals dedicated to the discovery, innovation, and development of new products, technologies, or processes within an organization. The primary goal of an R&D team is to push the boundaries of knowledge and create solutions that provide a competitive advantage or address specific market needs.

R&D team members typically have diverse backgrounds and expertise in various fields such as engineering, science, technology, and design. They work collaboratively to conduct research, experiments, and analysis, with the aim of generating new ideas, improving existing products or processes, and exploring new opportunities for the organization.

FRONT-END TEAM

A front-end team consists of professionals who specialize in developing the user interface (UI) and user experience (UX) components of a website or application. They are responsible for creating the visual design, layout, and interactive elements that users interact with directly.

Front-end team members typically have expertise in HTML, CSS, and JavaScript, along with knowledge of front-end frameworks and libraries such as React, Angular, or Vue.js. They focus on creating an engaging and intuitive user interface that is responsive across different devices and browsers.

BACKEND TEAM

A backend team is a group of professionals who specialize in developing and maintaining the server-side components of an application or a website. They are responsible for building the logic and functionality that powers the application, manages data, and communicates with various other systems.

Backend team members typically have expertise in programming languages such as Java, Python, Ruby, or Node.js, as well as knowledge of databases, server management, and API integration. Their main focus is on creating robust and efficient server-side code that handles requests from the front-end, processes data, and returns responses.

TESTING TEAM

A tester team, also known as a quality assurance (QA) team or testing team, is a group of professionals responsible for evaluating and ensuring the quality, functionality, and reliability of software applications or systems. Their primary focus is to identify and report any defects or issues to improve the overall quality of the product.

Tester team members typically have expertise in testing methodologies, tools, and techniques. They work closely with the development team to verify that the software meets the specified requirements and performs as expected in different scenarios.

APP DEVELOPMENT TEAM

A mobile app development team is a group of professionals who specialize in designing, developing, and maintaining mobile applications for various platforms such as iOS and Android. They are responsible for creating the software that runs on mobile devices and delivers a seamless user experience.

Mobile app development teams typically consist of different roles, including mobile app developers, UI/UX designers, quality assurance testers, project managers, and sometimes backend developers or API integrators. They collaborate throughout the app development lifecycle to ensure the successful delivery of a high-quality mobile application.
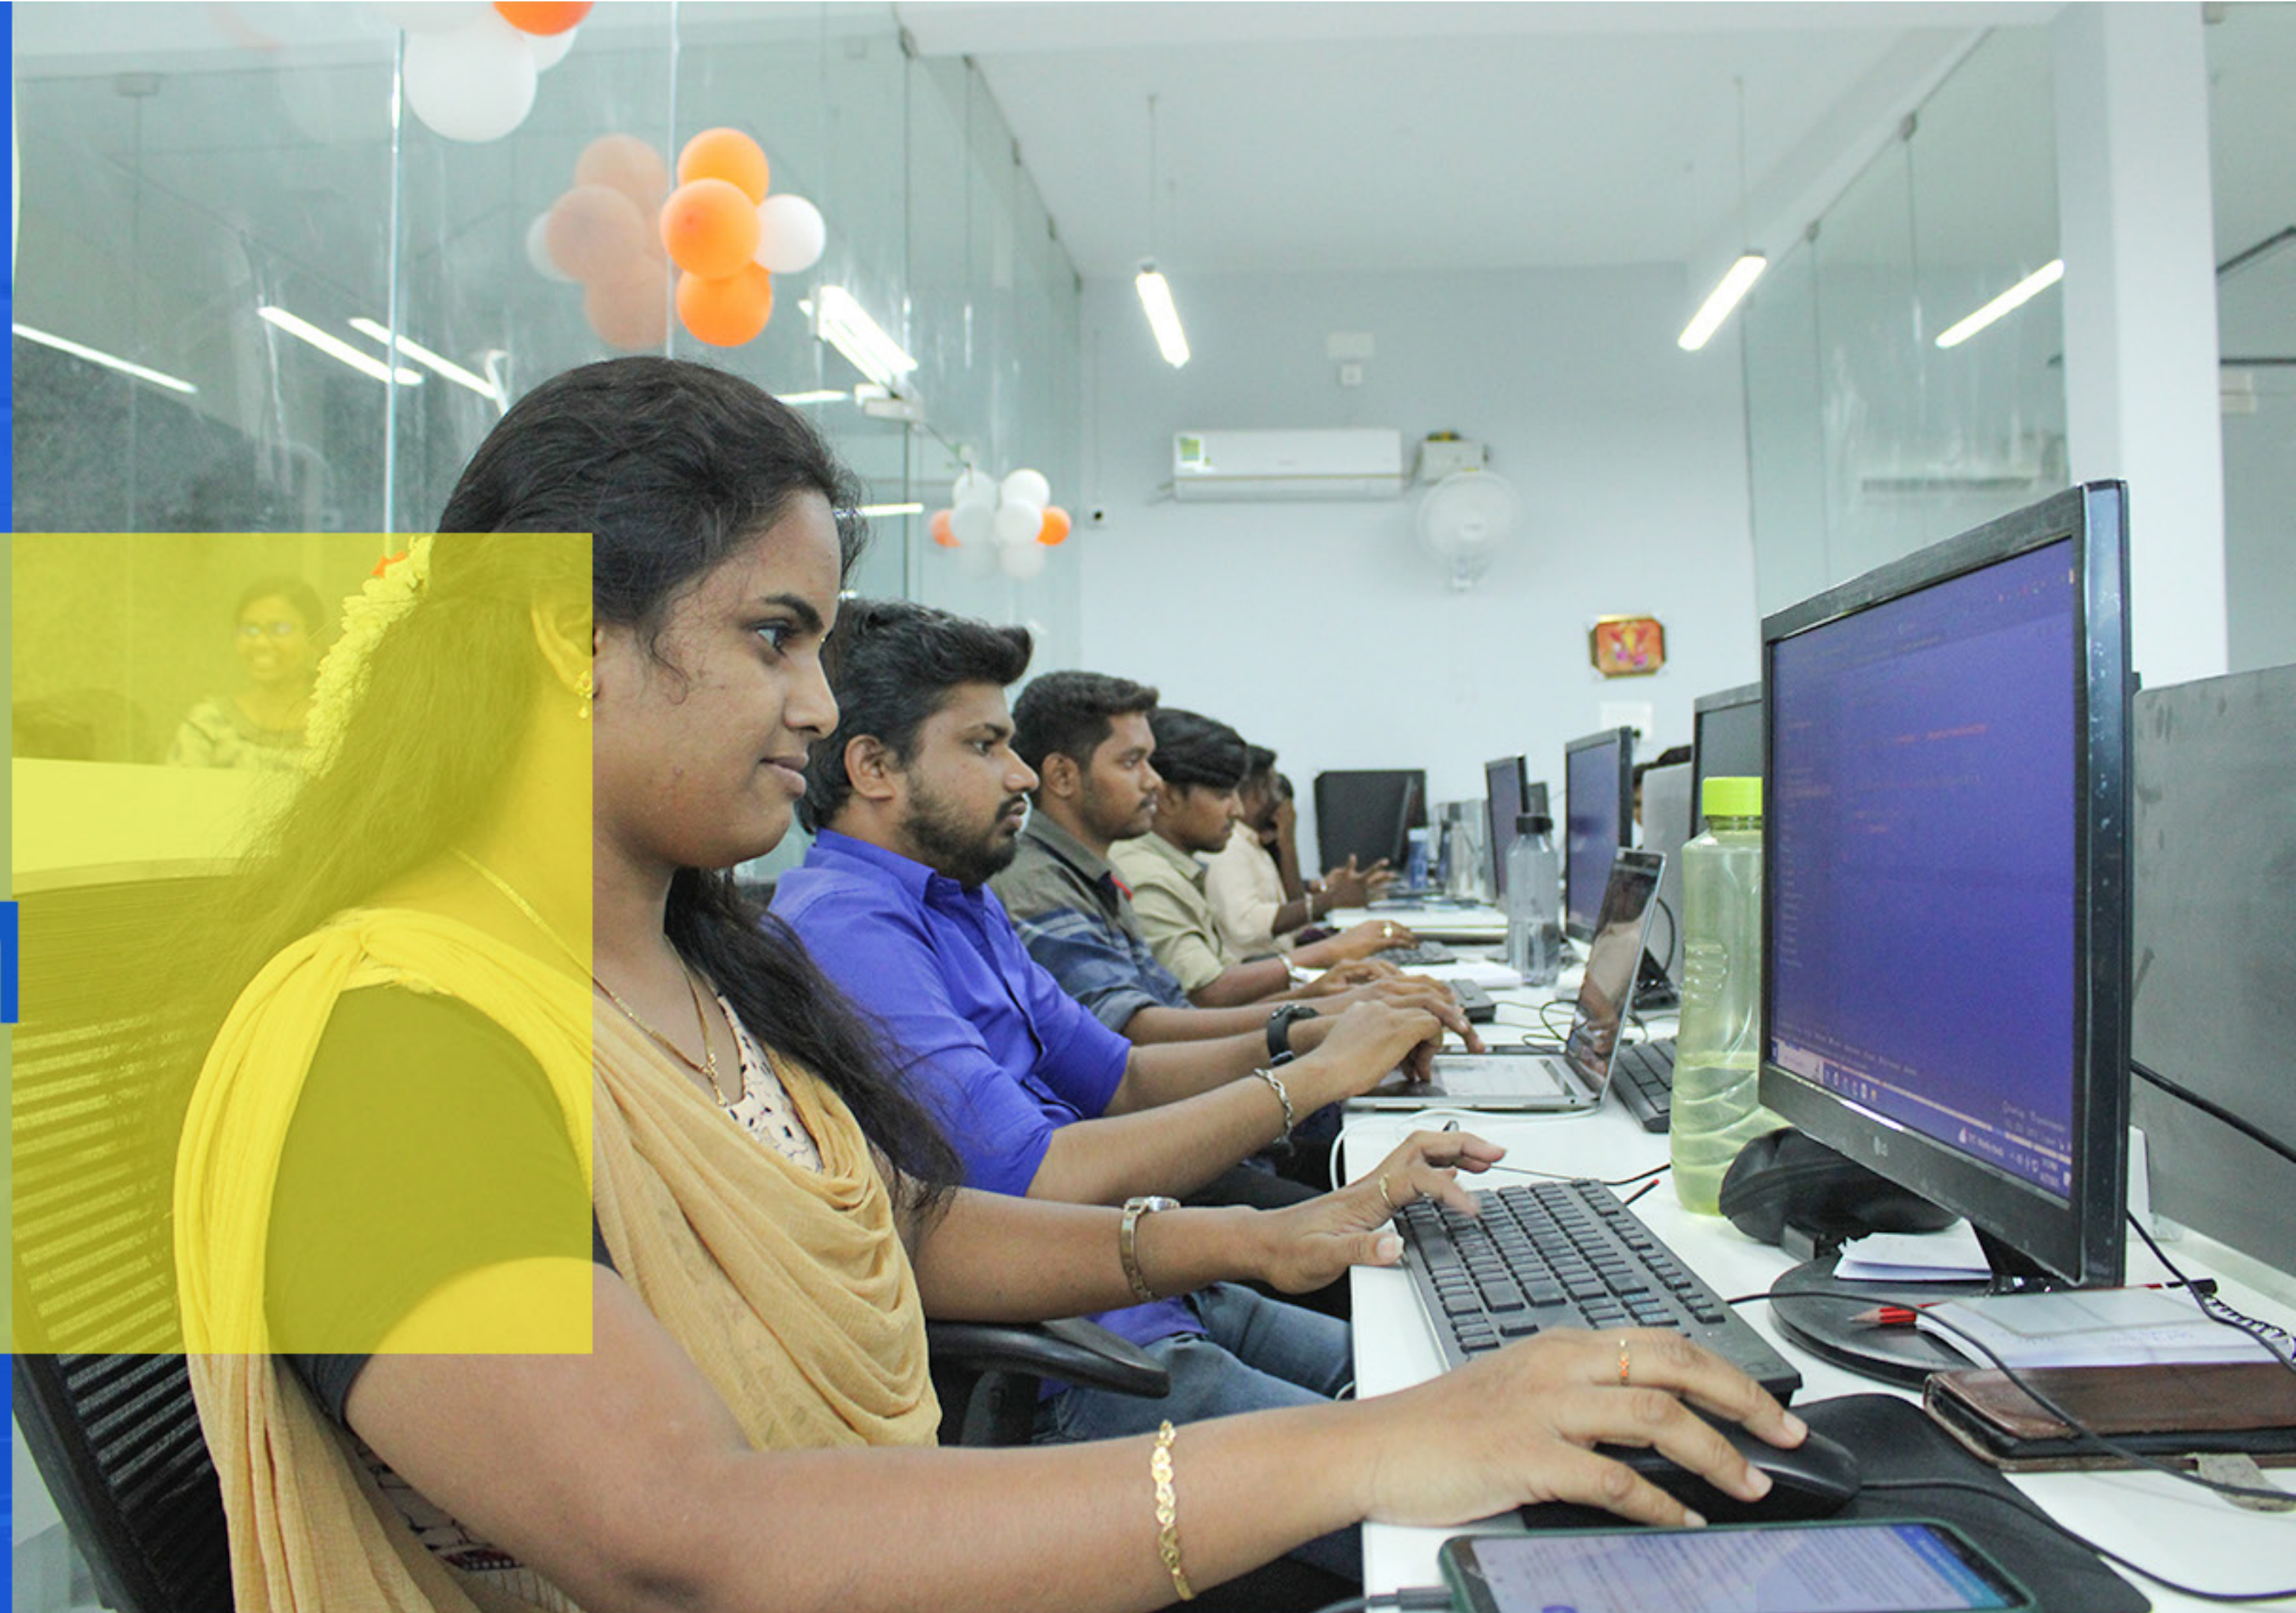

DIGITAL MARKETING TEAM

A digital marketing team is a group of professionals who specialize in promoting and advertising products, services, or brands through various digital channels. They leverage digital technologies and platforms to reach and engage with target audiences, increase brand awareness, drive website traffic, and generate leads or conversions.

Digital marketing team members typically have expertise in areas such as search engine optimization (SEO), search engine marketing (SEM), social media marketing (SMM), content marketing, email marketing, and analytics. They work together to develop and execute strategies that align with the organization's marketing goals.
